

Canadian Primary Care Research Network

Réseau canadien de recherche en soins primaires

Network Objectives

Learning health system

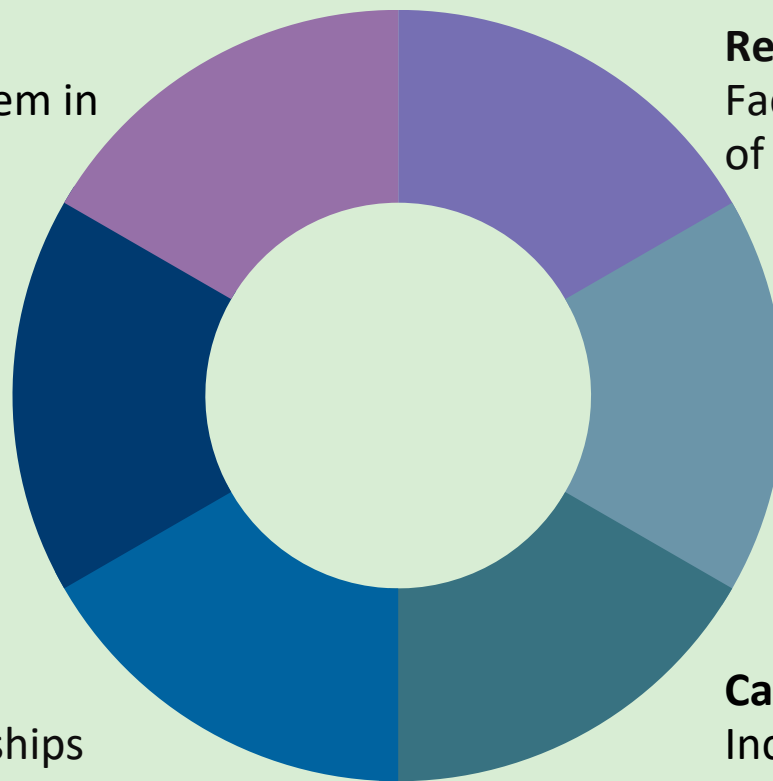

Build a learning health system in primary care

Equity, diversity and inclusion

Promote equity, diversity, and inclusion (EDI) opportunities and best practices

Engagement

Create sustainable partnerships

Research projects

Facilitate the reach and adaptation of primary care innovations

Knowledge translation

Generate and mobilize knowledge that informs and transforms practice

Capacity building

Increase capacity for patient-oriented, practice-based research among network partners

Network Deliverables

A Primary Care Information System (PCIS) and Practice-Based Research and Learning Networks (PBRLNs)

Cross-jurisdictional research projects

Knowledge products and mobilization initiatives (infographics, community of practice)

Capacity building opportunities

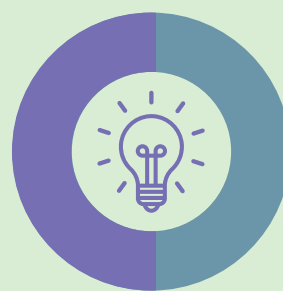

Sustainability plan

EDI plans and health equity assessments for all research projects

Network Impact

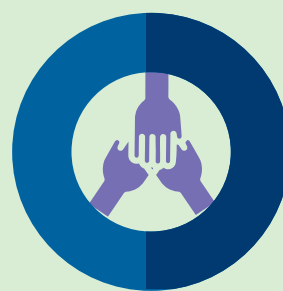

A robust PCIS and highly functioning PBRLNs

Scale and spread of evidence-informed innovations in primary care across the country

A highly skilled and engaged research community

Sustained partnerships and meaningful engagement
